

Use this guide with your [Master Ring](#) to unlock new sounds!

Blue represents that the peg should be raised, while **White** pegs should be pressed in.

Insert the Master Ring into the DX Tega Sword with the flat side down. Take care not to press hard enough to reset the pegs.

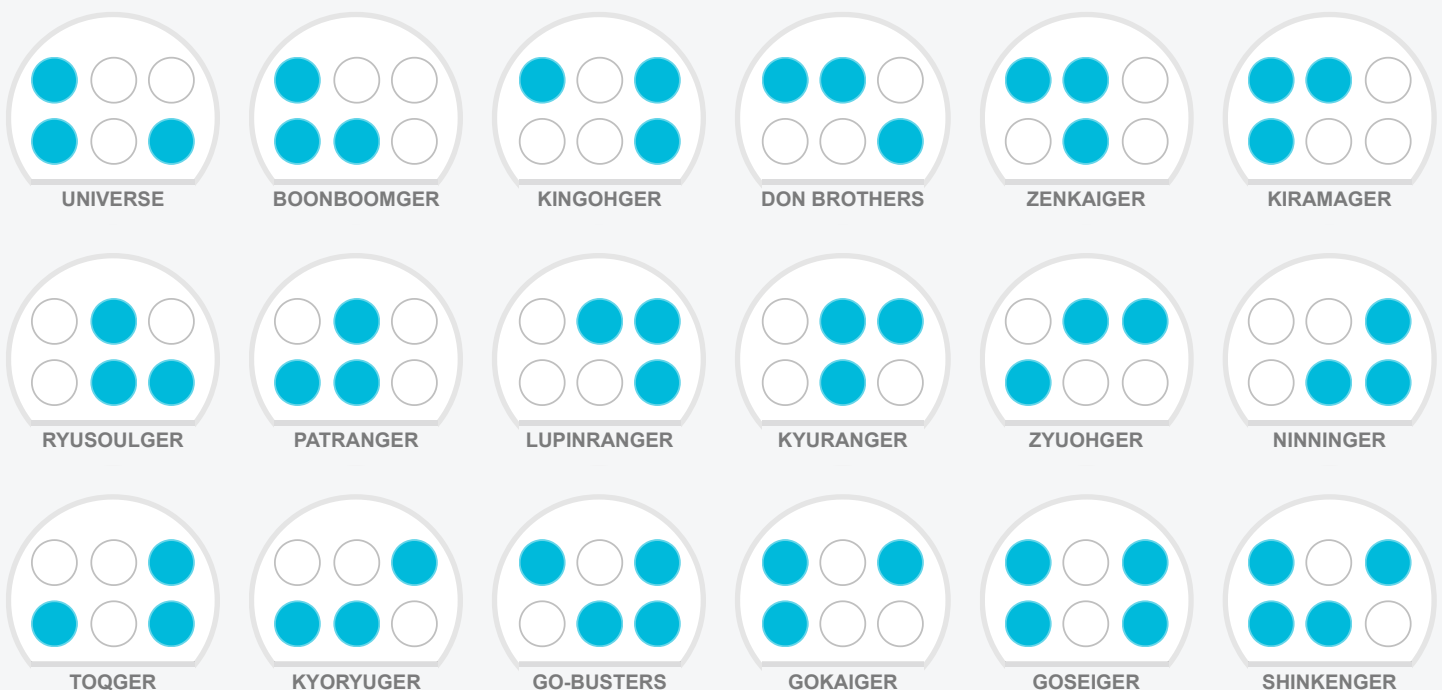

To reset the ring, rotate the 2 halves of the ring until the flat bottom of both halves align and then press the ring into itself firmly. You should hear a click and the pegs should fully reset.

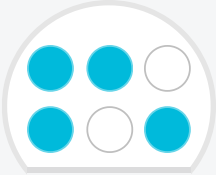

IMPORTANT: Be sure to have the ring aligned with the flat parts at the bottom when resetting or inserting the ring into a DX Tega Sword to ensure proper pin operation.
